MANIKANDAN V

Engineering Graduate

+916374754336 . manivengadesan26@gmail.com . India

Summary

Aspiring MERN Stack Developer with hands-on experience building full-stack web applications using MongoDB, Express.js, React, and Node.js. Proficient in RESTful API development, state management (Redux/Context API), and responsive UI design. Passionate about clean code and eager to contribute to scalable projects.

Projects

Blockchain-Based Secure Voting System

Developed a decentralized voting application to ensure tamper-proof, transparent, and anonymous elections using blockchain.

Designed smart contracts in Solidity to automate vote recording and tallying, reducing human error.
